

The Natural Rhythm Of Stone Brings Glory To Your Feet

The magnificent poetry of natural stone patterns is reproduced with technology, making every inch of self-adhesive floor stickers a flowing landscape painting! No need to carve, quietly spread elegance in a room!

TAKING THE SOUL OF STONE SHAPING THE CHARM OF HOME

PVC Stone Plastic Self-Adhesive Floor Stickers The Smart Choice Of Materials For Modern Homes

PVC stone plastic self-adhesive floor stickers are a new type of environmentally friendly floor decoration material. With polyvinyl chloride (PVC) and high-density stone powder as the core, the natural stone texture is reproduced through hot pressing process, and the surface is covered with high-definition wear-resistant layer and self-adhesive layer. Its ultra-thin thickness of about 1-2mm can not only achieve the realistic visual effect of precious stones such as marble and granite, but also has the unique flexibility and non-slip properties of PVC material, and it feels warm when walking barefoot.

The product adopts an innovative self-adhesive design. It can be directly laid after peeling off the transparent backing paper. No professional tools and glue are required. The construction of 15 m² space can be completed in 30 minutes. It is especially suitable for old house renovation or rental upgrade. It has excellent waterproof and moisture-proof performance. It can also be used safely in special areas such as kitchens and balconies. With UV coating anti-fouling technology, it only needs to be wiped daily to keep it new for a long time.

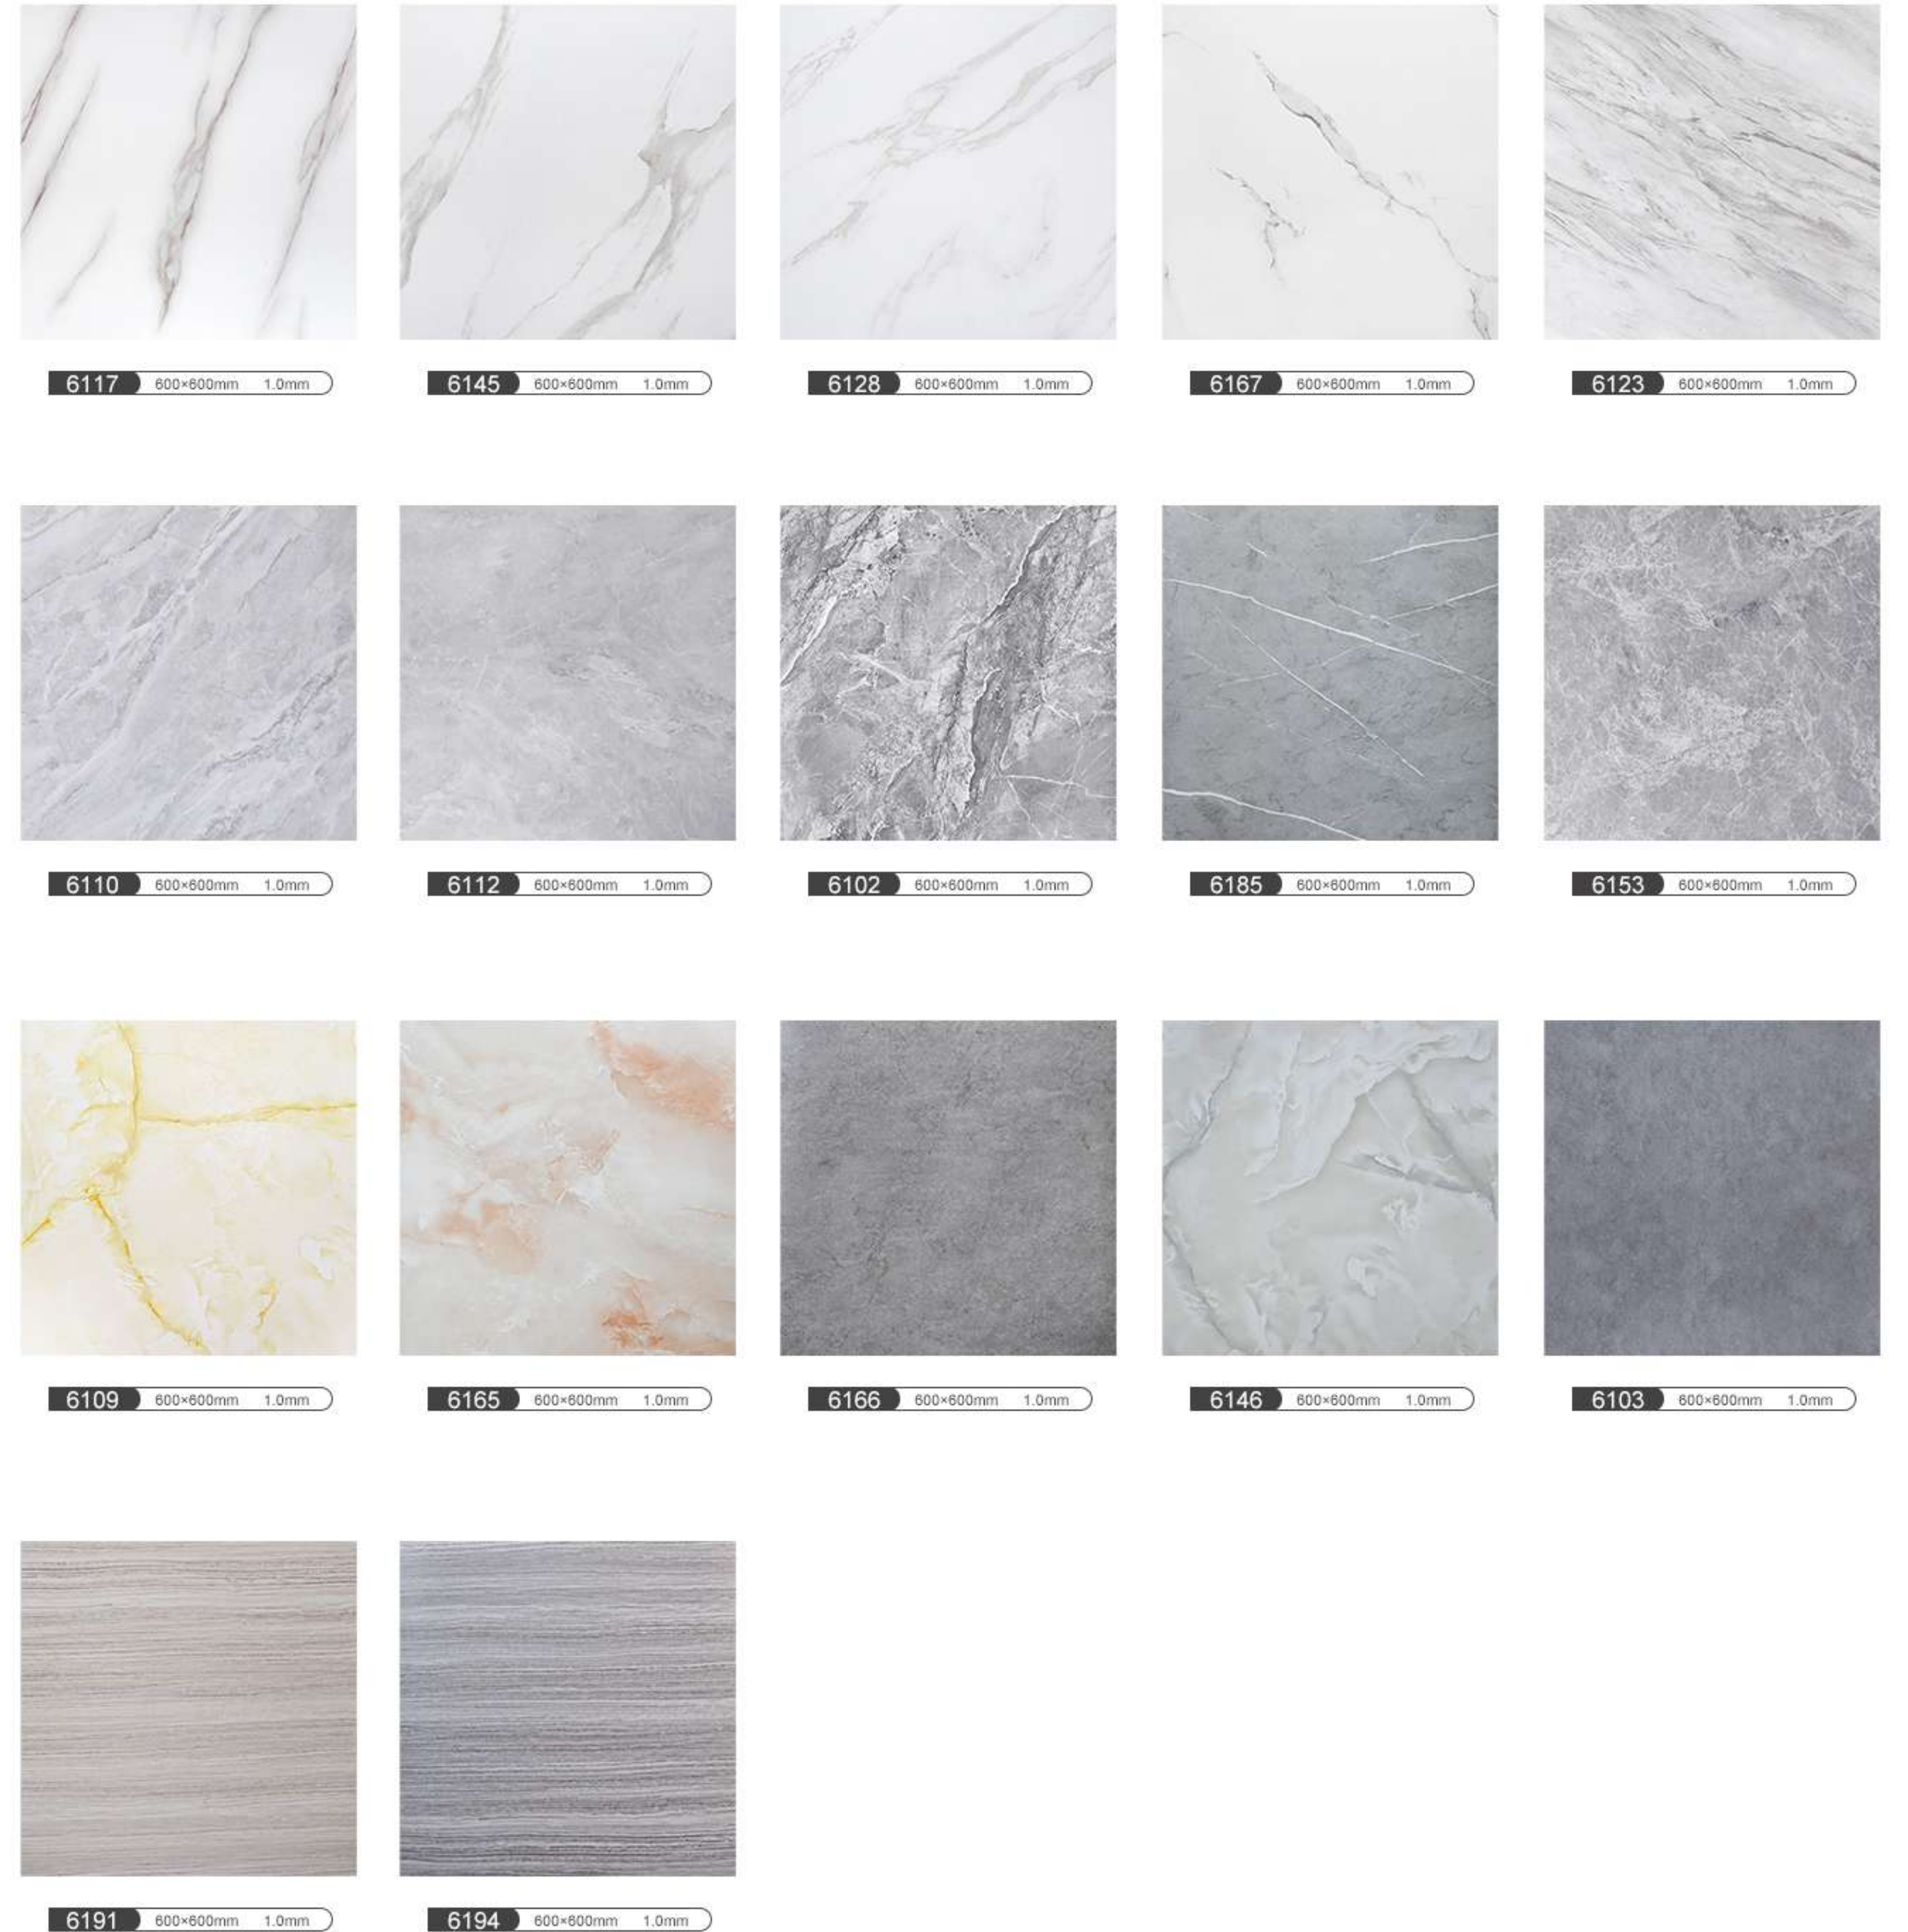

Compared with traditional stone, its weight is reduced by 80%, the transportation and paving costs are greatly reduced, and it does not contain a large amount of formaldehyde, heavy metals and other harmful substances, and has passed the SGS environmental certification. Whether it is to create a light luxury style living room, a Nordic style bedroom, or a quick renovation of a commercial space, it can achieve the decorative effect of high-end stone at 1/3 of the price, making rational consumption and quality life perfectly balanced.
